Methods: Empathy Mapping, Personas, Storyboarding, User Testing, Iterative Design, competitive analysis.

Languages: English (Fluent), Spanish (Native), French (Intermediate).

Professional Experience

Product Designer

Bertoni Solutions GmbH | Nov 2021 – Present

Company-wide responsibilities

- Led requirements gathering by facilitating workshops with stakeholders, translating business needs into functional requirements, information architecture, flow diagrams, and use cases.
- Designed interaction models and user interfaces, presenting solution options to stakeholders and advising on cost and risk trade-offs.

- Conducted design walkthroughs with development teams, clarifying behaviors and ensuring accurate implementation.
- Presented design outcomes to stakeholders through interactive simulations and orchestrated scripts for complex multi-user flows.
- Supported QA processes by defining acceptance criteria, reviewing test results, and reducing rework by ensuring design-development alignment.
- Facilitated daily adjustments by updating requirements, documentation, and designs in collaboration with stakeholders and developers.

Selected Projects

- **E-commerce Construction Platform (Mobile App):** Improved product discovery and personalized shopping experience with flexible delivery options. Defined search engine requirements that gained industry recognition in a national competition, while unlocking additional use cases for client employees (inventory and re-stock efficiency).
- **Vehicle Auction Platform (SaaS Dashboard):** Designed processes to supervise auction states, manage auction owners by user and organization, outline received payments, and handle registration requests. Created dashboards to help institutional clients monitor and act on auction activities in real time.
- **Institutional Credential System:** Designed dashboards and workflows for institutional clients to manage credentials, students, and plans. Clarified complex validation rules and credential verification through blockchain and Moodle integration, reducing errors and manual interventions.
- **E-commerce Health Platform:** Transformed manual processes into an automated e-commerce system. Integrated a large database of 500K+ items with advanced filters, search engine, loyalty programs, promotions, and order history, enhancing scalability and customer engagement.

Freelance Product Designer

Red Activa | 2022

- Collaborated with a team of 2 developers to design and launch a responsive landing page for Red Activa, a financial services company.
- Gathered requirements directly from stakeholders, transforming business ideas into functional specifications and user flows.
- Designed and implemented responsive layouts for web, tablet, and mobile using Webflow.
- Delivered key features including:
 - Service information (Western Union, associated banks, financial services).
 - Cost estimator for bank transfers.

- Loyalty system with point tracking and promotions exchange.
 - Location-based services to display nearby branches, with manual filtering options.
 - Embedded tools for downloading receipts, invoicing, transaction certificates, and shipment tracking.
 - Franchise and concession information.
 - Conducted usability testing to ensure seamless interaction across devices.
 - Trained the marketing team on managing and updating site content (e.g., promotions, announcements).
-

UX/UI Designer

cloutZOO | Mar 2020 – Jul 2021

- Designed and prototyped mobile and web experiences for a social networking platform that connected users with services and jobs.
 - Improved user flows and usability by benchmarking competitor platforms and integrating best practices.
 - Delivered UI specifications and interactive prototypes for Android and iOS development teams.
-

Education

Systems Engineering – IUPSM, Venezuela | Jun 2020
